The Dentist's Role in Dental Sleep Medicine

with Jim Szarko, DDS, Diplomate ABDSM

October 14, 2016 at the Center for Occlusal Studies, Parkersburg, WV

Course Topics
~ To Establish a Basic Knowledge of What is Sleep and the Management of Sleep Disorders
~ To Understand the Polysomnogram/Polysomnography (sleep study)
~ Airway Anatomy and Physiology
~ How Man Developed Sleep Apnea
~ How to Conduct the Dental Sleep Examination
~ Types of Oral Appliances - Pros & Cons
~ Pharyngometry and Rhinometry-Testing Procedures
~ Methods to Taking a Bite
~ Treatment Protocol
~ Screening Forms

Course Goals:
A) To gain a new understanding and a focus to identify apnea in your patients.
B) To understand the screening and diagnostic process to get your patients in a position to be treated with oral appliances and the dental protocol to treat them.
C) To screen and refer more patients for diagnosis and treatment of this deadly disease by building and facilitating relationships between MDs and dentists.
